Course rules and procedures

The course syllabus is the same as last year in semester B, except for the followong changes due to the war:

- Do-at-home lab D (Assembler) and the 2nd lecture on assembler are optional rather than mandatory in this semester.
- Students with long army service, as well as others strongly personally impacted by the war, get special dispensations according to the wartime rules format authorized by the BGU Senate.

This page contains rules for taking this course, a supplement to the syllabus. Still under construction, and not complete until this is removed, Students are responsible for following every rule herein, especially the ones pertaining to academic honesty, for which we have a separate document.

1. This course requires attendance at all lectures, active participation in all labs, and timely submission of all assignments ("do-at-home home labs"). **This includes students not yet registered to the course who may register later on**.
2. You must attend only the lab group to which you are registered. The only exceptions to that are students still not yet registered to the course at the beginning of the semester, and rare special cases explained below.
3. In lectures, it is recommended that you attend the lecture group to which you are registered, though this will not be enforced unless the above causes congestion. **Attendance will be checked by a quiz to be done during or immeditely after the lecture**.
4. Note that there are labs roughly every other week, while lectures are intermittent. There is a lecture on week 1 of the semester, and labs start on week 3. The course MOODLE page contains the exact plan.
5. There will be a final exam at the end of the semester. As stated in the course syllabus, to pass the course you must obtain at least a passing grade in the final exam (56), as well as a passing grade in at least 7 labs (at least 4 of which are physical attendance labs), and an overall passing lab grade average (with labs you did not attend counting as a grade of 0).

If you cannot attend a lab for valid reasons (topmost being army service), you must notify the course staff as soon as you become aware of such an issue. Minor cases (such as army or documented illness lasting 1 or 2 days) may be handled by lab switching and TAs. Major issues will be handled by the course coordinator.

Rules on lab participation are also essential to understand, and are in a separate document.
